**DETAILED ACTION**

***Response to Amendment***

The amendment filed 05/24/2004 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: ***a metal shield 500 and sheath 5000 surround the external semiconducting casing 8, as shown.***

Applicant is required to cancel the new matter in the reply to this Office Action.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 37 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant fails to disclose an adequate written description of the flexible conductor further comprises ***a metal shield disposed therearound, and a sheath disposed around the metal shield.***

***Allowable Subject Matter***

Claims 23-28, 30-34, 36 and 38-45 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2832

The prior art of record do not teach of suggest, in the claimed combination thereof, a transformer comprising low and high voltage windings, wherein turns of the high voltage winding being intermixed with turns with the low voltage winding and each winding having a *flexible conductor which includes a central conductor includes a plurality of strands of wire, a portion of said strands being insulated strands such that at most only a minority of said plurality of strands being in electrical contact with other strands that are not insulated.*

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
